HOW TO CHOOSE: *Rails vs. Louvers*

Rails: *Constructed of individual steel rails that span between uprights. Weigh less than louvered panels, more economical, small footprint, easy to remove bins from rails.*

Louvers: *(Page 34) Steel panels with rows of punched louvers. More storage capacity, greater selection of styles. Panels can be attached to the wall, freeing floor space. Rivet racks come with the panels already riveted to the frame.*
